

# FLOWSERVE

Alaska Service Center

Flowserve Flow Solutions Group (FSG) is the driving force in the global industrial marketplace.

No other company in the world has the depth or breadth of expertise in the successful application of pre-engineered, engineered and special purpose mechanical seals and support systems.

Flowserve FSG produces products for many industrial market segments, including the oil & gas, chemical, power, hydrocarbon processing, mining, and water resources industries.

For more than 10 years the Alaska Service Center has serviced and repaired highly engineered mechanical seals for the oil exploration and refining industries, as well as pipeline requirements, and the mining industries for copper and gold. Full service capabilities include disassembly, cleaning, engineering analysis and performance inspections, assembly and certification testing. With mechanical seal engineering and design support, the operation specializes in value added repair services which include equipment upgrades or redesigns to provide solutions to difficult applications or operating conditions.
